deoxycholic 1500 U.I.**

• **Keywords**

Deoxycholic 1500 U.I.

Deoxycholate helps in the breakdown and absorption of dietary fat. When applied into the fat, it destroys fat cells, and no longer these cells will store or accumulate fat. It is recommended for beneath the chin, resulting in a reduction of localized fat.

**product information**

**presentation** 1500 U.I. x 5 vials

**main ingredients** Sodium Deoxycholate 1500 U.I.

**main characteristics & effects** Synthetic deoxycholic acid in a higher concentration. It works by disrupting the cell membrane of adipose cells and stimulating targeted disintegration of fat cells.

**recommended for** Localized fat, double chin, lypolysis

**usage** Can be used topically, transdermal with virtual mesotherapy (iontophoresis or electroporation), with RadioFrequency, ultrasound and with other mesotherapy procedures.

**application**

Treatment frequency:  
Every 2 - 3 weeks  
(approx. 6-10 sessions)  
Maintenance treatment:  
1 session every 3 months

## cocktails

# fusion repair

• **Keywords**

Skin damage, Scars, Acne scars, Regeneration

Is formulated as a strong revitalizing and moisturizing cocktail, suitable for tired and damage skin. The active ingredients that compose this powerful cocktail gives the skin elasticity and helps in treatments like flaccidity, wrinkles and expression lines.

### product information

**presentation**

10 ml x 5 vials

**main ingredients**

DMAE, Sodium DNA, Vit. B12 (Cyanocobalamin), Vit.C (Ascorbic acid), Retinol, Vit.E (Tocopherol), Hyaluronic acid (Sodium Hyaluronate), Organic Silicon (Methylsianol Mannuronate)

**main characteristics & effects**

Revitalizing cocktail, promoting a skin regeneration, hydration, stimulating collagen and elastin, supporting connective tissue and contributing for healing process.

**recommended for**

Skin damage, scars, acne scars, revitalization, regeneration

**usage**

Can be used topically, transdermal with virtual mesotherapy (iontophoresis or electroporation), with RadioFrequency, ultrasound, with microneedling (dermapen or derma-Roller) and with other mesotherapy procedures.

**application**

Treatment frequency:  
Every 2 weeks  
(approx. 5-10 sessions)  
Maintenance treatment:  
1 session every 1-2 months

## **topical ampoules**

100

Selection of active ingredients to the target layers of the skin: 5 topical ampoules for 5 specific skin concerns.

**application areas**

• face &amp; body

**topical ampoules**

# glycolic vit. e + f

**• Keywords**

Superficial peeling that contains ingredients which stimulate collagen and elastin production promoting skin renewal, helping reduce spots and hyperpigmentation, fine lines, wrinkles, scars and other signs of aging. The solution removes dead cells, increasing cell renewal as well as providing a radiant, rejuvenated skin. Vitamins E and F help protect the skin from the external aggressions and reduce small wrinkles by boosting elasticity and hydration. It also protects the skin from the effect of the glycolic acid.

101

**product information**
**presentation** 10 x 2ml

**main ingredients** Glycolic acid, Vitamin E, Vitamin F

**main characteristics** Enrich active esfoliation, with glycolid acid, will promote a cell renewal gently, strengthen the protective barrier of the skin, supporting skin elasticity and hydration.

**recommended for** Acne, Aging Skin, Dry skin

**usage** Apply 1x per week.

**application** Apply after cleansing the skin. Apply with cotton swab or brush on face and neck. Let work for 5 minutes. You may feel a gentle tingling, resulted from glycolic acid action. Recommended to use on evening. After can use a topical ampoule and finalize with mask or cream.

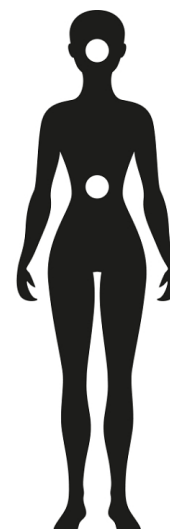

**complementary products** Cleansing milk; facial toner; proteoglycans; hyaluro peptide repair; facial renew; gsh cream; hydrogel mask; sun block 50+.

## topical ampoules

# antiaging flash

• **Keywords**

The Antiaging Flash ampoules are indicated for expression wrinkles and facial lines. Its ingredients with reaffirming and renewal properties reduce small facial wrinkles and improve skin smoothness and luminosity. This solution maintains a well moisturized skin and achieves an immediate tensor effect.

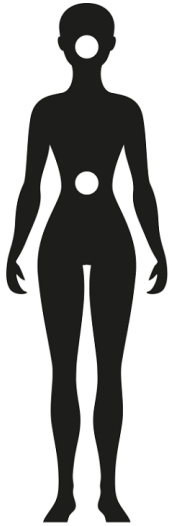

102

### product information

<b>presentation</b>	10 x 2ml
<b>main ingredients</b>	Ascorbic acid, Ascorbyl Palmitate , Hydrolyzed Elastin, Soluble Collagen, Mimosa Tenuiflora Leaf Extract.
<b>main characteristics</b>	Complex of ingredients that will energize the skin, promoting a "wake up" reaction, eliminating signs of fatigue, giving a lifting and bright flash appearance for an unique skin. 8 hours of lifting and flash effect.
<b>recommended for</b>	Aging Skin, Mature skin, Facial massage.
<b>usage</b>	Apply 2x per week. For an intensive resulta apply daily (morning).
<b>application</b>	Apply after cleansing the skin. Apply on the face and neck, with a soft massage, twice per week. Daily application for an intensive treatment. Great to apply before a special event.
<b>complementary products</b>	Cleansing milk; facial toner; glycolic vit.e+f; antiaging cream; shiny cream; sun block 50+.

**application areas**

- face & body

**topical ampoules**

**argan oil**

• **Keywords**

The ampoules contain Argan Oil which nourishes, moisturizes and rejuvenates the skin, providing greater luminosity. It has a powerful anti-aging effect and prevents wrinkles naturally. It also provides hydration and elasticity and stimulates cellular oxygenation.

**product information**

**presentation** 10 x 1ml

**main ingredients** Argan Oil.

**main characteristics** Pure organic oil, with nutrients, fatty acids and Vitamin. Contain properties that rejuvenate with a strong antioxidant action, giving the skin a natural healthy appearance.

**recommended for** Dry and devitalized skin , Hair care, nails and cuticles, Facial massage.

**usage** Apply 2x per week. For an intensive resulta apply daily (morning).

**application** Apply after cleansing the skin. Apply on the face, neck, hair and nails with a soft massage, twice per week. Daily application for an intensive treatment.

**complementary products** Cleansing milk; facial toner; Sali\_cylic; facial renew cream; moisturizing cream; sun block 50+.

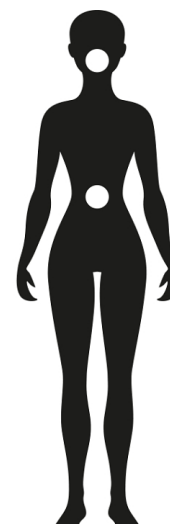

## topical ampoules

# musk rose oil

• **Keywords**

Due to their regenerating and moisturizing properties, the Musk Rose Oil ingredients are especially indicated for tissue regeneration, reduction of scars and stretch marks, expression lines and premature aging. Not recommended for acneic skins.

### product information

**presentation** 10 x 1ml

**main ingredients** Musk Rose Oil.

**main characteristics** Pure oil with high concentration of polyunsaturated fatty acids, with high properties to regenerate and moisture the skin. Healing the imperfection, great for scars and recent stretch marks, as recover a damage skin.

**recommended for** Tissue regeneration, Dry Skin, Stretch Marks.

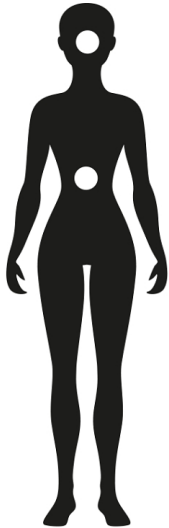

**usage** Apply 2x per week.

**application** Apply after cleansing the skin. Apply on the face, neck and hair, with a soft massage, twice per week. Daily application for an intensive treatment for wrinkles, scars or stretch marks.

**complementary products** Cleansing milk; facial toner; Sali\_cylic; facial renew; gsh cream; moisturizing mask; sun block 50+.

**application areas**

- face & body

**topical ampoules**

# proteoglycans

- **Keywords**

proteoglycans

acts as a depolymerizant of glycosaminoglycans. It has a high enzymatic activity and works as a diffuser agent of other ingredients. It actuates directly on the elimination of water retention and on the reduction of the adiposities. It exerts a restructured action on the connective tissue and rebalances the skin affected by a hydrolipodystrophy.

**product information**

<b>presentation</b>	10 x 2ml
<b>main ingredients</b>	Proteoglycans, Castor Oil.
<b>main characteristics</b>	Polysaccharides (GAG), a glycoprotein naturally found in the skin, moisturising the skin and improve the formation of collagen fibers, promoting firming and improve the epidermal structure and elasticity of the skin.
<b>recommended for</b>	All skin types. Facial massage.
<b>usage</b>	Apply 2x per week.
<b>application</b>	Apply after cleansing the skin. Apply on the face, neck and hair, with a soft massage, twice per week. Daily application for an intensive treatment.

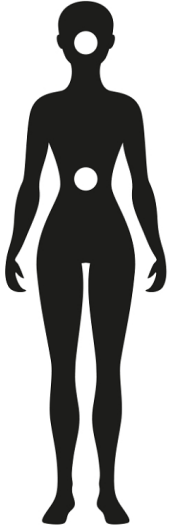

**complementary products**      Cleansing milk; facial toner; Sali\_cylic; facial renew; antiaging cream; hydrogel mask; sun block 50+.

**devices**

**cleaning roller**

• **Keywords**

A cleansing solution with disinfectant properties, highly recommended to disinfect skin and microneedles from dermaroller before, during and after use.

**product information**

**presentation** 200 ml

**main ingredients** roller

**recommended for** Derma Roller, Skin disinfection.

**usage** Apply 2x per week.

**application**

For derma roller:  
 1. Disinfect a bowl;  
 2. place the head of dermaroller with microneedles inside the bowl;  
 3. Apply cleaning roller liquid in the bowl till cover the microneedles; This procedure we should do 20minutes before treatment. We recommend to maintain the cleaning roller liquid in the bowl during the treatment and repeat the procedure 2 and 3.  
 For more details follow mc treatment protocols.

**complementary products**

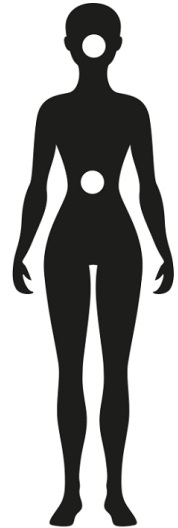

Cleansing milk; facial toner; Sali\_cylic; facial renew; hydrogel mask; sun block 50+.

**devices**

**derma  
pen**

• **Keywords**

DERMAPEN Auto Microneedle System is a revolutionary micro-puncture device that aims to tighten and rejuvenate the skin.

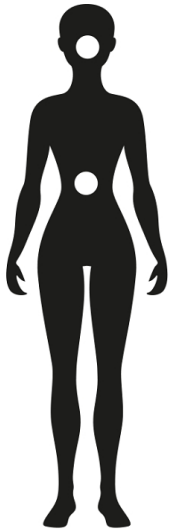

**product information**

<b>presentation</b>	Handpiece Adapter (EU/US) Two 12pins needles Packing bag
<b>main characteristics</b>	Electrical device that allows the use of 12, 36 or 42 needles 30G or to use nano needles. Can be adjusted from 0mm to 3mm for deep of microneedles application. Device which aims to tighten, lift and rejuvenate the skin with efficient therapy of collagen induction and elastin. Allow to create microchannels that will increase much more skin absorption of various active ingredients.
<b>usage</b>	Follow mc treatment procedure
<b>benefits</b>	Safer and more effective in puncture the skin than traditional derma rollers Superior effect on collagen and elastin rejuvenation Multi-speed and adjustable needle depth Highest effectiveness to treat areas more difficult to reach (ex.: around the eyes) Great stimulation to reduce scars and stretch marks and acne scars.

**application areas**

• face &amp; body

**devices**

# derma roller

**• Keywords**

Derma Roller is a device which induces the body into producing collagen, improving the diffusion of the active principles. The micro-needles create micro channels allowing the active ingredients to penetrate from the surface into the dermal tissue. It promotes the production of new collagen. It also provides a more effective penetration of the active ingredients (200 times more) in the stratum corneum.

**product information**
**presentation**

0.5 / 1 / 1.5 / 2 mm

**main characteristics**

Dermal device to activate collagen with 192 micro-needles

**usage**

Follow mc treatment procedure

**benefits**

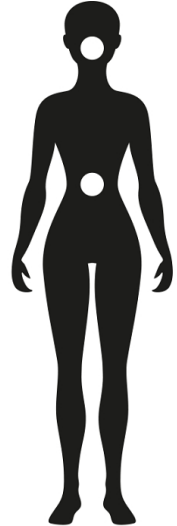

Improve the penetration of active principles  
 Promotes the production of new collagen layers  
 Reduce pigmentation problems, acne scars and pore size.

## devices

# meso gun

• **Keywords**

Meso Gun is a sophisticated device, very practical and with a modern and ergonomical design, that allows you to perform mesotherapy with ease, precision and reducing the time and pain of the procedure.

110

### product information

**weight** 550 gr

**main characteristics**

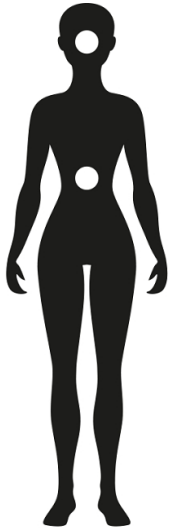

Administrates active principles in speeds varying up to 10 ml/min, which is about twice faster than most of the portable injectors. Works with standard mesotherapy needles ( 4, 6 and 13 mm) and syringes ( 1 to 10cc) and does not require any special disposable kits. With several different modes which allows continuous injection, intermittent injection, nappage, point by point and mesoperfusion.

**function**

6 pre-set injection modes:  
 Continuous Injection  
 Mesoperfusion Injection (0,0285 ml +/-0,005ml)  
 Nappage Injection (0,005 ml +/-0,001ml)  
 Micro Dose Injection (0,005 ml +/-0,001ml)  
 Standard Dose Injection (0,0285 ml +/-0,005ml)  
 Mega Dose Injection (0,30 ml +/-0,01ml)  
 Range of syringes: Syringe centrix Luer cone 10 ml, 5 ml, 2,5 ml, 2 ml, 1 ml

**application areas**

- face & body

**devices**

**micro roller**

• **Keywords**

Micro roller is a dermal roller device to activate collagen with micro-needles which improve the penetration of active principles. The release of active principles with the collagen induction therapy makes this a very practical and easy to use device and reduces the time of the treatment. The device also has a vial that allows to easily apply a cocktail of active principles.

**product information**

**presentation**

0.5 / 1 mm

**main characteristics**

dermal roller device to activate collagen with micro-needles, which improve the penetration of active ingredients.

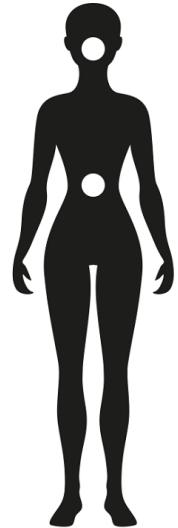

## devices

# skin analyser

• **Keywords**

The correct diagnosis of the skin condition is the most important step in achieving good and long lasting results.
